To Whom It May Concern:

In today's customer service oriented society, timely, friendly, proactive occupational safety training services are sought to stay within legislative compliance, keep our employees safe and as a result, enhance future business growth. Customer loyalty is always impacted when you employ the right safety training professional to represent you when assisting your valued employees.

Having been involved with Source Industrial Services' Operation Manager, Mr. Mark Brabant since 2000, I can definitely say that our division has benefited tremendously from his professionalism and excellent training abilities. All of our employees have consistently rated Mark, and one of his trainers, Mr. Peter Remers, as their trainers of choice when considering overhead crane training. Mark has always understood the needs of a cost effective approach to the automotive industry while keeping the learning fun and memorable and he has always delivered. We have had such success with Mark that I fully intend to be with Source Industrial Services for many years to come.

Source Industrial Services Inc. is an excellent training organization who easily achieves ongoing success with their trainers by building morale, maintaining our employees' self-confidence and training them to effectively use our overhead cranes in a safe manner at all times.

It is a pleasure to work with Source Industrial Services and I look forward to working with them again in the future.

Yours truly,

David Powers

Health, Safety & Environmental Manager
