

Course No.7

Mid-Term Evaluations

Complies with CSA Standard B335-04 and MOL Guidelines

Recommended for: Operators who are certified and have reached the 18 month mid-term point and for the 3 year accreditation to be in compliance.

Objective: Basic evaluation only of the operators skill set as it pertains to their operational use of the forklift truck, and to give management feedback on the operators driving ability. If required to recommend a tailored approach to the refresher training.

Benefits: **Reduction** in Incidents (which lead to **accidents**)
Reduction in **WSIB claims**
Reduction in **Product and building damage**
Reduction in **Maintenance costs**

Course Time: **Theory: N/A** **Practical: 1/2 to 1hr**

Skill to be Shown:

- Daily inspection
- Safe operational techniques
- Fuel handling
- Loading and unloading
- Stacking De-Stacking
- Safety in the workplace

Theory and Practical Competence Evaluation:

Theory: N/A

Practical: Each operator must be able to prove competency in all aspects of forklift truck operation pertaining to his/her job function.

No test is issued in this program, but a wallet card is issued confirming mid-term completed.

A written report is issued on each operator indicating attitude, response to instruction, operating knowledge, ability and our instructor's assessment of practical competence on a test marking sheet.
